SENIOR MANAGEMENT: INFORMATION TECHNOLOGY

~ Active Secret Security Clearance ~

Innovative senior-level technology leader with advanced expertise in program management, IT operations, research, application development, and network systems management. Exemplary professional record driving defense sector projects to successful completion in alignment with ambitious scheduling and budgetary objectives. Veteran of the United States Air Force with active secret security clearance. Equipped with more than 15 years of experience driving major initiatives complemented by a bachelor's degree in IT management, and extensive technical certifications / skills.

AREAS OF EXPERTISE

Team Leadership • IT Operations • Project Management • Program Management
Application Development • Risk Management • Systems Engineering • Network Management
Systems Acquisition Cycle • Architecture Design / Development • Requirements Gathering
Procurement • Specification Development • Services-Oriented Architecture (SOA)
Research • Technical Writing • Radio Frequency (RF) Communications

PROFESSIONAL EXPERIENCE

COMPANY, Location • 2007 – Present

Provider of systems engineering and information technology services.

Senior Project Manager

Lead classified and unclassified technology initiatives as an on-base contractor for the United States Air Force. Head top-performing teams of 10+ members to drive all phases of the development process in alignment with operational and technical requirements. Gather requirements and prepare technical specifications. Leverage extensive knowledge of requirements of the Common Data Link (CDL) program aimed at optimizing secure communications among intelligence and defense agencies. Oversee programs supporting systems engineering and architectural development for Joint Intelligence Surveillance and Reconnaissance (ISR) platforms.

Major Contributions:

- Facilitated seamless transition of CDL specification development and maintenance processes from a secure contractor facility in Utah to Government Program Office.
- Proved instrumental in streamlining specification distribution processes while maximizing security measures in collaboration with program office team.
- Earned a Directorate Small Team Award for driving success of a CDL project.

COMPANY, Location • 2001 – 2007

Leading defense and aerospace equipment and services provider.

Senior Systems Engineer

Optimized performance of a complex system by driving implementation of service-oriented architecture methodologies in alignment with official defense department framework guidelines. Performed analysis and generated systems integration solutions for data mediation and communication systems. Ensured optimal communication across cross-functional teams.

continued...

COMPANY, Senior Systems Engineer, continued*Major Contributions:*

- Created innovative joint web service capabilities utilizing services-oriented architectures to build a strong foundation for implementation of current technologies such as Oracle databases, cloud services, and Eclipse IDEs.

COMPANY, Location • 1997 – 2001*Major computer system development and manufacturing company.***Senior Systems Engineer**

Managed technology projects and operations, including internal server production and system performance monitoring. Developed and implemented strategic roadmaps to orchestrate all phases of disk relocations and system-wide modifications. Oversaw testing activities to ensure quality.

Major Contributions:

- Led a successful large-scale disk migration to improve storage density capabilities, consolidating 2+ RA80 drives onto a RA90 series drive in only 3 months.
- Headed management of virtual private networks (VPNs) to successfully enable secure remote access for end-users.
- Spearheaded development of a consolidated user interface to provide web access to applications on VMS, NT, and UNIX platforms.

Early career history includes 5 years of honorable service in the UNITED STATES AIR FORCE.

EDUCATION / CREDENTIALS

Bachelor of Science in Information Technology Management

Certificate in Webmaster Technology

Certificate in Microsoft Windows Programming

College, Location

Active Secret/SCI Clearance

PROFESSIONAL DEVELOPMENT

Defense Acquisition Process and Procedures • ESC Systems Engineering Process (SEP)
Project Management • Software Technical Writing • GIG (NCES/NESI, DoDAF, ConstellationNet)
Service Oriented Architectures (SOA) and Development

TECHNICAL SKILL HIGHLIGHTS

Platforms: Microsoft Windows • Linux • UNIX • Oracle Databases

Hardware: TCP/IP Networking

Languages: Java • JavaScript

Applications: Microsoft SharePoint • Eclipse IDEs • Adobe Professional • Microsoft Project
Microsoft Office (Access, Word, Excel, PowerPoint, Outlook)

FOREIGN LANGUAGE SKILLS

Fluent in French
